On a glorious morning in Judy of the tennel of our Lord 1883. I stood on the dick, of a noble statuer the Columbia which lay at her dock at the water front of Self Fancisco. Sears wis up and the donkey engine was goutering twan assisting the teredores to lost the vissed the cargo being largely colling to be a transfer of the attention of the state of the schedered peaches would roll out to the great delight of the gathered gamma and the apparent astisfaction of many of the long horemon who would semi-surreputiously pocket supplies to be discussed later on.

The ticket office at the shore end of the passenger gangway was been, and by my monosome purch using steering, teckets and disting the what boat at such places as they might be out of the way of the stevedored from is stood opposite. Her dispersing friends who were on the starboard guards of the steamer and they held metry consists and repeated time and again their good I yes.

The National Educational A sociation which last been attended by \$800 teachers halling from all parts of the union had just closed its labors in Sun I reduce of and

In a little while the cargo was in place and the freight gangways were lessing hauled ashore by the skewdores with their monotonous. Yet! He! Yeo. The captain rin up the passenger wy calling All aboard?" and then All ashore!" and in a few moments more at the tankle of a bell, the huge welking beam began see sawing, the water following the subsequence of the same and the gallant Calumbia moved gracefully out into the bir. This continued until I had begun to grow excessively anxious and uneasy less the trip should end before my object had beer gained, when fortune which always favors cheek—as well as the brive-gave me by the merest accident the vantage sought. It was the evening of the third day out from Sau Francisco. We had passed up the grand columbia river aimed the most glorious cenery att day, to the mouth of the Williamette—the bridegroom and his bride, who had now entirely recovered from her sea sickness had sat for many hours empoying the giories of nature out-pread. The was a remarkably handsome woman with dark time eyes, hair that was wavy and a for a that would have been a match for the hunting godless and save for the transient trick of mal die mer which is liable to assail anyone who hasn the stomach of a marble statue she was the picture of health.

We had just entered the mouth of the Williamette it was evening and the gibbons moon a cone bright above the trees, while her path of light glistened on the stream shaft nearly to the opposite shore of the wide tolumbia and far on the mouth of the Williamette it was evening and the gibbons moon at one bright above the trees, while her had to light glistened on the stream shaft nearly to the opposite shore of the wide tolumbia and far on the mouth of the wild have the left. on the train next day Peachie and I, and my friend were passengers in a Pullman car and for fear of a scene I continued to withhold my identity antit evening come and we sat in the stateroom of the car together. I had been talking to her of Kentucky and her husband and she began liftle by little to faintly suspect. I drew her to it as defily and as gently as po sible some times her heart almost stood still. Her love and hope had remained true. The memory of her soldier husband was a part of her religion, and its strongest bulwark. When at last I told her who I was though I brought at about by tracing the life of her husband all the way from bhiloh's field through Mexico and Colorado and his amay trips an search of her—woman like she festited on my breast. But, like the strong, sensible woman she is she quickly revived, and has acted most decorously ever since. We were much together during the sees ion of the convention. Visited in company the places of interest about the city and it soon became bruited among the teathers that that will be a match?

We were married on the evening before we left San I rancisco according to the cere nonies of the Episcopal church and we are going home to Kentucky. We have a ritten the old gentleman that we wil send for him later on if he desires to come.

Fortnighty Review

In the gradual development there is always a sense of pleasure in the exercise of power but this pleasure has to be subordinated to the good of society and this is one of the first nacessary steps to successful social growth. So the coung boy who is, even among on, more frequently cruel than sympathetic may go through a period of bullying, etc., to become a refined and sympathetic man full of generous impulses. It say this is the ordinary method, but, as might be expected some boys never become kindly and some instead grow from cruel to brutal and end as social peets. It is supposed that the lower animal, especially the carnivors are pleased with the forture they cause but I doubt if this is it e only interpretation of the treatment of the mouse by the cut and of his victure by the low.

There are chiteren who inflict forture on every kind of living thing. This I have known a child of tender years begin by pulling off the wings of fites then proceed to take frogs, and next take birds and bore out their eyes and later still try to might end their eyes and later still try to might have known such children kick cats and dogs to death or set light to them or pour boiling water over them, the flendish pleasures hang increased it the toding of the animals were thus reduced to star ration. begin their work at the top. The roof goes on first and then they begin to build the walls and to construct the interior. One of the greatest curiosities to me in Tokio is a new hotel which is being built if it is to be on the foreign style and is to have four stories. It will be the greatest hotel in lapan and will rank here as Flegler's hotel in Florida ranks in the United bystes. It covers about an acre of ground. As yet not a stone of the foundation is made but the roof is already up and this stands on agreet four story skeltion of casiloiding awaiting the building of the rest of the structure. This scalioiding is made of long poles from the size and thickness of a campaign flag staff down to the size of a bambou fishing rod and the whole is tied together with impessionable and are of sticks and ordinary rope. There are, I was told at the office, "OD poles in the skeleton and 1000 men had been at the work for months in making it.

At the back of this building I saw two men clothed in six inches of cloth about their waists pumping water by pressing down a treadle with their feet. The labor was very hard and they have been at it con intouchy over; day since I have been in Tokio. They probably receive less than twenty five cents of our money per day for it. In the United States the work would be done by steam but Japan knows little of steam as yet, outside of the government.

Tokio Thev probably receive less than twenty five cents of our money per day for it. In the Laited States the work would be done by steam but Japan knows little of steam as yet, outside of the government factories and the railroads and human muscle is a cheaper fuel than wood or coal Professor Georgeson a bright American who is semployed by the government to teach the Japanese agriculture, has just returned from a visit to the silk regions of the interior and he tells me that the motive power for rumning the reels of many a factory consists of two men who walk around in a circle like a horse in a tannery or a threading machine pushing two poies which, by a series of cogs run the works in the room below. These men said he, received ten cents a day for their work, and the silk reelers, who were girls skilled at the bustness, got fifteen cents a day. Still labor is higher now than it he sever been in Japan and it has business, got fifteen cents a day. Still labor is higher now than it he sever been in Japan and it has more than the sever teem and one of the first Americans to come to this country tells me he ture remember when farm laborers received only two cents a day from receives savs Professor teorges on ten cents a day, and on this I am told they can live very comfortably. This ten cents however represents the hardest of work. Farming in Japan is done by hand and every grain of rice represents a strained muscle and a smell from the manure which would give an American the germoof typhold fever. The grabbing hee is the spade of appan and a net work of ropes is its wheel-barrow. The work on the roads is stone without the and of horses and the dirt is carried on these little ropes is aloud fever. The grabbing hee is the spade of appan and a net work of ropes is the other. They hold about two bushels each and have ropes ted to the corner, which are lad on the ground and hoed full of soil or stones. They hold about two bushels each and have over a pole. Then a man takes hold of each where it is needed and dumps it

The day will come however when my chinery will be used by the Japanese people. The leaven is here and it is working slowly. It has already done much with the government and it will eventually though it may not be for generations, leaven the whole lump of these 38,000 000 of people. It will revolutionize the country and the muscle which is now hauling jurkshas by the hundred thousends, which is sawing logs by hand, and which is doing countless other things which steam or electricity can do as well will be turned to manufacturing and it may be much to the detriment of the other manufacturing nations of the world. The Japanese are wonderful intuitiors. They are bright enough and skillful enough to do say thing that almost any other man can do and they are not backward in catching up a good thing when they see it. They have here a land full of coal and fron, copper and other matals. They sell us every year \$11,000,000 worth of raw slik. They could as well send the manufactured product and they have resources of other kinds which could be turned into articles that all the world wants. With their natural ability to copy, with The day will come however when mis

The chief langer lies in the cheipness of their itsing and the fewness of their wants in the coun ry here I am told that a moder ately well to do family can live very ricely ntely well to do family can live very meety at a tool of from live to ben cents a div for their food. Professor Georgeson says that an ordinary liborer can live royally on tenetus a day and that the wrently at the agricultural college pay about one cent and a half for each of their mails. This represents nice vegetables and now and then a bit of his lites all that the laborers so make the companies of the liberary so make the professor which would still be a chance for the Japaness to engage an insulationing at a profit which would still be a chance for the Japaness to engage an insulationing at a profit which would run the high priced establishments of the labte between the appropriate and the same for the labte of the countries of Asia take up manufacturing and if his is now the give you can get skilled labor for lifts cents in day and this labor can live on less than one talf this amount there will be a competition from the last term countries greater than any we have cy rhater milingland or Germany.

This estimate is so complete that riss I houbt not the entire outlit of many a Japese home of the poorar classes. It sounds very meagre but in a land where the bread is nee and the drink is test where no sheets and carputs are used and where the joinge and the rocking chair has yet to be introduced it seems to suffee The poorest classes pillow their heads upon blocks of wood rovered with a wad of paper. They use their own heels for chairs and their thors and a comforter form their beds.

The Jupanese are content with initie and it is from this attribute of their nature, that Americans need not expect to compete with them in business in their own country. They do business on a margin that would ruin an American trademan and if they make his counts on the sale of a watch or ten ruin an American tradesman and if they make hive cents on the sale of a watch or ten cents in selling a clock they are satisfied Where a thrifty tradesman can live and bring up a family on \$10 a month there is little hope for the luxurous American. The whole nation seems to be engaged in what a Connecticut Yankee would tall a whitting buss raises. The stocks of many of the stores would not bring \$\frac{1}{2}\$ at auction and the merchant sits like the Turk in his bazan surrounded by his goods and with his legs crossed serves his customers. His thoor is his customers and his goods hang on the wall's or are piled within easy reach of his hands. He his a space altogether about as large as a small bed room and the whole of the front of this is open. The floor is raised about two feet from the ground and the customers sit on the edge as they haggle over the prices. The Japanese merchant always asks three times as much us he expect to get. You offer him about one-little and gradualty reach the third. He gives you at his cup of the axond places beside you as bowl of charcoal for your pipe while you are looking at his goods, and as a rule it seems to be indifferent to him whother you hay or not. If you go away without taying he bows politely and says. 'Sayonra." I spent some time in going through the wholes describes of Tokto. The Japanese are good pickers and they put up their goods for shipment in a different way from our. There are few nails used in faitening up the boxes or crites and rope almost universally takes the place of nails. Greats for boxes are tied up with rope and in some of the lumber varis. I see that the boards are tied together in bundles and stood on earlied together in bundles and stood on the lumber varis. I see that the boards are tied together in bundles and stood on the lumber varis. I see that the boards are tied together in bundles and stood on the lumber varies are practically stores and these immber yards are practically stores and these immber yards are practically stores and they may be found in all parts of the city. As to the use of string in tying up packages, this is very rare. A strip of trice paper is sometimes twisted about a parcel but woolen or cotton string is seldom seen. I noted in the buying of some photographs that the clerk who made up the package had some of this string. It is the same that our grocers use. The clerk first measured the parcel this way and that and took just enough to make the knot and no more. Still string is cheaper here than with us. I mention this as an example of the economy of the people.

And still you will find but few rich Japan esc! The rule here is that the people are not accumulative, in our sense of the word. They have never learned the philosophy of investment and they spend all they make. They have in the past had no chance for the investment of money except in lands and the saving done has been largely for rebuilding their houses in cases of fires which are very frequent. Dr. Hepburn who has been in Japan or more than their very six is my authority. quent Dr Hepburn who has been in Japan for more than thirty years is my authority for the statement that a Japanse house is thought on the avarage to last only sive years before it is destroyed by fire The frame work and the interiors are like under, and whole villages are swallowed up almost monthly in Japanese conflagrations. The people are the most careless people in regard to fires I have ever seen, and there are no fire departments to speak of out of the four of fire large eities. This danger has thus been an incentive to saving but above this there is little. Seven-tenths of the people at a rough estimate live from hand to knowth though the postal savings banks which have been introduced but fair to teach them differently. Interest is high and the banks make money. There is not a large government debt and the most of the debt is held at home.

The Latest Reform Movement in Beattle-What Attorney General Meton fe May Do-A

[Sp. 1.C reported read The Greens soll beatter Nov. 30 Sheril (defrance is a reform deriveral since the late election lie wit the neutrinoid that some mays are less for expedients by which to get into the reform summ. By once mysterious dispensheriff's present reform movement. The sheriff did not then know it. He was not then aware that a reform lamp was then be-ing lighted to illuminate his way back to the parts of orthodory that he was thark enough to see the light later on. The republicans won and the sheriff lost his bet. His faith watered but finally he made up his mind to made that grind organ winhim renown. He placarded a big box. him renown He placarded a big box with a notice that contributions for the chiritable institutions of king county would be received ind planting a most measiful to the turned the trank for two hours. The people cared nothing for the music. They liked the spirit of the filler and the shekels rolled into that box at a great rate. After the grinding was over the money was appeared and it was found that Bull had the grinding was over the money was counted and it was found that Bill had the grinding was over the money was counted and it was found that Bill had made for sweet charity s cause just exactly \$1.00 11% an hour. Pretty good work. The sill in became the tails of the mon and county. The new spapers were generous and heralded broadcast the particulars of sheriff tochranes performance. It isn't fair to look a gift horse in the eve. It would not be just to impute to Mr. Cochrane other than generous motives. Those two hours' work did a great deal to restore. Bill to the good graces of the people of King county. He deserved all he won. Most people industry that that was the last of the matter. Mr. Cochrane from the top of the wive of public enthusiasm evolved deep designs in the interests of sourcety generally. Whe dare say that a light from heaven did not pierce the murky democratic atmosphere which ordinarily enveloped the sheriff and inspire him with nobler aims than to be sheriff! Anyhow he resolved to keep a going. The next step he took in the light of new inspirations was to corral a lot of gamblers. After he had gathered them in the temperature of the shake he gave to some of his old time friends and democratic compatitions was low enough to child the in the temperature of the shoke he gave to some of his old line friends and democratic compatriots was low enough to chil the very marrow in the bones of a polar bear. Frost dropped from the undusting air as his reblikes were borne to their ears. They shivered and fied it now appears the gamblers must go, for Bill has said so Mr. Cochrane's motives may be slightly mixed, but whose are not? He is entitled to credit for what he accomplished and if my one wants to begin throwing stones they had better first carefully weatherboard their fragile environment or they might break something mear at home. The sheriff's next move in his march toward reform will be watched for with much interest.

R. department of Indians sent the following printed state ment to the associated press.

I want to enter a protest against the state ment in the Eastern press about a defection among the comrades of the G. A. R. in this department. Nothing of the kind has occurred and the membership was never more united and enthusiastic in their support of order than now. A mudful of disappointed chronic office seekers here have succeeded in getting themselves advertised throughout the country who have no standing nor never had in the G. A. R. for that matter. The whole bustness has been engineered by half a dozen chronics and at no meeting have they been able to secure an attendance of litty persons and not to exceed thalf these three ever been members of the G. everywhere that Christian civilizati a bleases the world its chief indication. If totald in the observance of the Sabbath day. Whitever may have been the fact of the old livid principles there was often a wonder in these with the beautiful that the contraction. in tiness in the law promulgated and then cord with the wants of man and the need of humanity strike forcibly the mind of everyone who studies them and reads sright their often wonderful appropriateness. Man y a work no animal and he needs rest Night brings him the rolt of sleep that re-cruits the tired system for the labors of an other day but the 8 abouth brings him the relief and recreation of a day when cares de not intrude and busines is left behind. When the French r volutionists tried to reform the Messac system and matitated the tenth instead of the seventh day as the period of rest it we soon di covered that Mose-was right and French revoutionist were wrong. Through the whole of the Jewi h law the same fitness of things ax ends, and we wonder how in that early age when to our ideas the world was new there could be pronounced such wise comin nds ind just rules of life But man in the days of the Pharsohs must have tooled back on times that were older and had bislory and biography to invite comparison and instit

Mankind are mistaken often in their es timate of the Subath day. To the ancient Jews it brought rest and recreation and not comber tooks and solemn tone. No work was done, no cook ng even, not a hand was infted or a knee bent in labor and no travel allowed save the Sabbaib day's journey of three miles. But throughout all the land there was cheerfulness and feesting and gladness They played instruments, and sang and danced, and had the rest and re-lief that such innocent amusement gives that such innocent amusement gives And during the holy day they went up to the proper place of worship and gate thanks to the lord. It is more in consonance with our own time to keep the Sabbath as the Isralites did than it was with orthodox rehigherts that a century ago, but the Sabbath is not so often as it should be made to recognize the goodness and mercy of God Saturday night is welcome bequase it forselist the coming ret. All the working

world collect the wages for the week \* work and husbands carry home their carnings to wives who know how to make their homes choerful and happy - Spring time and sum mer autumn and winter, all have their Sab-baths and their Saturday nights. Through the procession of the years from vouth to age the weeks pass us by and the Saturday mighs become fewer and less and the light apringing step of youth grows weary and slow but still the welcome shadows of the working week bring our Saturday night

tween Morthou and Alder streets, has been under quarantine since the death of the Chinaman from smallpox at that place two weeks ago. Eve Chinaman who were exposed to the disease have been carraled in a small room in the rear of the joss house ever since. It was thought that perhaps some of the Chinamen would contract the disease, hence these very proper precautions were taken to mard against any possible spread. It is two weeks ago to-day that these men were confined in the sick ward of the Joss house, but not one of them has shown any signs of having contracted the disease. Instead of being taken with the smallpox they are all growing fat and anxious to get out. As now all danger is past, and the limit for the time it takes for the disease to develop having expired it was thought to longer necessary to keep the place under quarantine. The quarantine was raised last night and the place thoroughly fumigated. The Chinese are such queer people anyhow, that they will not contract the smallpox even when they have the best chance.

turned yesterday from Corvallis, where he has been engaged for several days past in ussisting in the case of the state against Heavy Miller, the boy murderer, of whose conviction of murder in the second degree mention has already been made in The Ormonias. There were several prominent attorneys retained for the defense, and Judge Caples was employed to assist in in conducting the prosecution. The Benton Leader devotes considerable space to the proceedings of the trini, which owing to the youthindness of the prisoner at the bar, attracted a considerable degree of attention. In speaking of the arguments made pro and con by the attorneys in the case, the Leader pays in very high compliment to Judge Caples, whose forensis efforts on behalf of the state was characterized as logical, foreible and eloquent.

BRIEF MENTION.

Fabre's Goffee and Chop House moved to Theater Royal building, Third and Aider.

QUARANTINE REMOVED .- As is well known

ESCAPED CONVICT FROM EFORANE.—About isix weeks upo a man answering to the name of Frank Forbes was arrested on a charge of rounding the streets at late hours. It was then thought that some greater orine could be fastened upon lim, for the very looks and actions of the man stamped him as a criminal. No additional charge was found against him in this city. He was suspected, however, of teing one of the men who had escaped from the jail at Spokane Falls on the 18th of October. A picture of Forbes was sent to the authorities at that place and the likeness was at once recognized as that of a fugitive from the Spokane could be sent after him. Deputy Sheriff Jerman came after the prisoner last Friday and after securing the necessary requisition papers he returned to Spokane with him yesterday morning.

Tribute to Airsworth and Conole.—The

TRIBUTE TO AIRSWORTH AND CONGLE.—The Onkland (Cal.) Enquire, of November 26, in its report of the proceedings of the Grand Lodge of Sorrow, A. F. & A. M., said: "Edwin A. Sherman said that he would that to other hands than his had been committed the duty of prononneing calogy for illustrious dead, and that J. C. Ainsworth, 321 degree, were here, to utter words in memoriam of John B. Congle, past grand master of the Grand Lodge of Oregon. He then gave a sketch of the life and the Masonic record of the deceased, whom he said was one of the most active members of theorder in Oregon, and appreciated in the grand as well as the sulpordinate lodges." TRIBUTE TO AIRSWORTH AND CONGLE.-The

A FINE LAWN.-There, is no lawn in the A FIRE LAWS.—There is no lawn in the city incre universely Bustern wisitors than that at the postoffice, which, being in a conspicuous place, is necessarily observed by all. It is somewhat an agreeably transformation for visitors to see the bright, verdant sod when they have just left their own clime, where the ground is covered with a mantle of snow. The leaves that have gathered upon the grass, having been waited by gendle gasts from adjacent trees, are being raked off, and the lawn will then present a still more brilliant appearance.

From Southern Oregon.—Mr. R. Abra-

FROM SOUTHERN OREGON.—Mr. R. Abraham returned from his stock ranch in Umpqua valley on Thursday. He has about one qua valley on Thursday. He has about one hundred and fifty head of beet cattle on the range, and though he has long resided in that section never in that time has be seen the grass so luxuriant at this senson. The stock show a remarkably good condition from grazing instead of being stall fed, as is usually the case in November. He expects to cause the shipment of several car loads of beeves to this market early in the spring.

Accident at Summit.-Last Friday, as the younger fortunitely striking the horse and escaping turther injury. Mrs. Concep-struck a tree, and sustained a number of severe contusions, which on being cared for do not promise necessarily to be scrious. STILL LEADING.—The sale of lots at Sunny-side is increasing every week over the week

side is increasing every week over the week previous, and as the time is drawing night when all unsold lots will be advanced \$100, it would be well for intending purchasers to secure a home in this beautiful spot. The street railway management is thing everything for the comfort and rapid transit of passengers for Bunnyside, and with the always attentive agonts on the ground everyday, overything is made pleasant for visitors.

Exage or Water—Natwithstanding the STAGE OF WATER - Notwithstanding the STAGE OF WATEL—Notwithstanding the recent rains, the river showed at 5 o'clock Friday night the lowest register for the summer and fall being five-tenths above the zero mark. At this time of the year no connection is transable between the amount of rainfall and the river's stage. Frequently a precipitation of an inch will be followed by a fall of several tenths in the water. That is, the Columbia will continue to regulate the water's stage until the winter's rains are much more beavy and continuous.

WOSKIND SPIERDING SPIERDING the leter

WORKING BPLENDIDLY .- Since the late Working Epithenian,—Since the late changes made at the postoffice, giving the registry department more room, the work of that department is greatly facilitated. The interior arrangements are not yet quite complete, still the work is being done under grenter advantage, and the clerks are well picased with the change. There is now plenty of 'ethow room,' and the annoying crowding that would at times attend the work in the old quarters is no more.

work in the old quarters is no more.

New Bloop and Money From—This great boom city of this continent. Hon, John May, one of the aidermen of Kansas City, Mo., and Mr. Geo. Dougherty, a business man of the same place, who have been examining the Pacific coast, and all the terminal cuites of Puget Sound, have decided that Portland is good enough for them. Yesterday they purchased of Raight & Donner, all of block Nor. II and 12 in Highland, which is good enough for anybody.

Was Tr a Ramon Shor?—Mr. J. Kincaid which is good enough for anybody.

Was it a Raybon Shor?—Mr. J. Kincaid, living three miles north of Damascus, about nine miles from here, was in the city yesterday, and stated that while he was cooking his breaklast last Sunday a shot was fired through his door, making a three-inch hole in his unaple table and entering the stovepipe. Mr. Kuncaid suspects no one, as he is living on very amicable terms with his neighbors. He says that no shooting affair his ever occurred there before.

Fergu on pirlumentary secretary of the foreign other reolied that the present government was not responsible for the waste of treasure and blood in the Soudan. The advice sent to the Lyptian government was to maintain a purely defensive policy. But a defensive policy did not imply the surrender of Bushim, which would leave the country overrum with Arabs. Surely Morley did not seriously suggest the absolute abandonment of bushim. Recurring to the slave tride the speaker said ho was able to influste that the government had proposed to Belgium to unitate fresh references to the powers on the lines indicated by Cardinal Lavigeere.

Morley's motion was rejected.

The market shows a bolder front and is more agreeably active than i usual at this season of the year. Thanksgiving coming this week it would have been reasonable to expect a falling of the kransactions but such is not the case for the above table shows it has been a very good week. The following table shows.

Morgan the boy who shot J H Johnson in the leg out in the canyon road about a week ago Johnson is a joung man having lately arrived from kansas and was engaged in chopping wood when the accident occurred. The shooting was purely accidental Johnson was being shown the revolver by Lloyd when the weapon was discharged the ball entering Johnson's left leg and institution guite a dangerous wound. Johnson was taken to the house of his friends at No 107 North Eleventh street where his injuries were attended. For a while he was in a very critical condition Blood poisoning had set in, and it was feared that he would either lose his limb or his life. Through, the skillful care of a physican and close watching such a consumnation on the road to recovery.

Immediately after the shooting the boy in whose hands the weapon had been discharged disappeared and during all the long and critical liness of the victim of the expense o' a physician s care.

These books have been kindly donated to the society and are let out to those who may desire to take their reading to their homes. Newspapers and periodicals are placed at the disjonal of those frequenting the rooms. The room though being free from the extragant finery and decorations of an nesthetic bondon presents the greater charm of being homelike. In its arras gements and furnishings it has that cheerful homifike appearance with hin the it a pleas and place to while away a large half hour The rooms are open every neek day from 9 octock in the morning full 9 octock in the morning full 9 octock in the evening and on Sundly from 11 M titll 9 P M Visitors and friends of the octety are always welcome.
